

## **The Chevrolet Corvette Experience**

Experience a ride in a Corvette like you never have before....or even imagined before. The General Motors Desert Proving Ground-Yuma has the unique responsibility to thoroughly test GM vehicles under hot weather conditions and ensure these vehicles can withstand the extremist of conditions.

The Corvette is a part of this critical testing, racing through tracks at speeds over 100 miles per hour, swirling into 360 degrees circles and maneuvering with additional Corvettes like a synchronized swimming team. These vehicles are pushed to their limits making them today's finest vehicles on the road.

Two lucky winners from the NCRS 2012 Arizona Regional will have the opportunity to experience a thrilling ride in a Corvette at the General Motors Desert Proving Ground-Yuma. This individual will get to see firsthand the amazing performance that only a Corvette can provide.

To be eligible you must stay at the host hotel (Holiday Inn – Palo Verde). Anyone who registers for the Regional and stays in the host hotel will be automatically entered.
